DETAILED ACTION

Claims 2-4 and 7-13 are pending in the application.

Election/Restriction

Applicant's election with traverse of Group III, and the species of Compound Ib (reproduced below) found on page 11, in the reply filed on August 22, 2005 is acknowledged.

Compound Ib

The traversal is on the ground(s) that both the inventions of Group III and Group IV involve binding an anion, with the claims of Group IV being directed to a particular embodiment of the claims of Group III and therefore, a search of the claims of Group III and

Art Unit: 1626

Group IV would overlap and no undue burden would be placed upon the USPTO to examine the claims of these two groups together.

Applicant's arguments have been considered but have not been found persuasive. Elected Group III is directed to a method of binding an anion (i.e., a process of making) whereas the invention of Group IV is directed to extracting an anion from a mixed composition such as nuclear waste material, a separate process. Further, separate search considerations are involved for each process as seen by their different classifications. Therefore, it would be an undue burden to the Examiner and the Patent Office's resources if unrestricted.

The requirement is still deemed proper and is therefore made FINAL.

Art Unit: 1626

Claims 9-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention. Applicant timely traversed the restriction (election) requirement in the reply filed on August 22, 2005.

It is suggested that in order to advance prosecution, the non-elected subject matter be cancelled when responding to this Office Action.

Information Disclosure Statement

The Information Disclosure Statement filed November 17, 2003 has been considered by the Examiner.

In claim 7, under the definition of R₇ and R₈, "alkyl" is misspelled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 2-4 and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Causey et al. {Journal of Organic Chemistry (August 23, 2002), 67(17), pages 5963-5968}.

Causey et al. disclose a process of contacting a biimidazole (i.e., compound 1b found in Scheme 1 on page 5964) with an anion (i.e., Cl⁻). See page 5964, second column, through to the first column on page 5965.

Allowable Subject Matter

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
